

The new proPANEL units are half the size of previous models, measuring 26"H x 18"W x 7"D and ranging in weight from 26 to 37 pounds, allowing one-person installation. Because the units are modular and come fully assembled and wired, they also help to speed and simplify radiant installations and setups. And connecting multiple panels to a single hydronic controller, such as the new Uponor Climate Cöntrol™ Multifunction Controller, is a simple plug-and-play operation.

Four models are available:

- proPANEL 90: single-zone pump without mixing
- proPANEL 90M: single-zone pump with mixing
- proPANEL 90Z: dual-zone pump without mixing
- proPANEL 90MZ: dual-zone pump with mixing

The panels are designed for a maximum target of 90,000 Btu per hour (Btu/h) and are fed with a 1" tubing and ¾" secondary connections.

"When we set out to enhance our proPANEL units, we wanted to offer our customers a product that helped save them time and money while providing an innovative, high-quality, reliable product," says Hudoba. "Based on the response we've received from the industry, we have succeeded."

**The new proPANEL® unit easily connects to Uponor's new Climate Cöntrol™ Multifunction Controller, upper right, via simple plug-and-play operation.**

**Uponor Corporation** is a leading supplier of PEX-a plumbing, fire safety and radiant heating and cooling systems for the residential and commercial building markets across North America and Europe. Uponor Corporation employs 4,700 people globally and is listed on the OMX Nordic Exchange in Helsinki, Finland.

**Uponor, Inc.** is headquartered in Apple Valley, Minn. For more information, visit [www.uponor-usa.com](http://www.uponor-usa.com) or call (800) 321-4739.

**Uponor Ltd.** is currently based in Regina, Saskatchewan, although the Sales and Marketing business units will relocate to Toronto in 2008. For more information, visit [www.uponor.ca](http://www.uponor.ca) or call (888) 994-7726.
